PROFESSIONAL SUMMARY

Driven Full-Stack Web Developer and BSIT student with a proven track record of building and deploying live, client-used web applications. Leveraging a strong technical foundation in Next.js, Node.js, and PostgreSQL alongside real-world business acumen from managing personal buy-and-sell operations. I specialize in replacing manual data processes with secure, tailored digital dashboards, bridging the gap between complex software development and actual business needs.

WORK EXPERIENCE / PROJECTS

Self-Directed / Independent Projects — Full Stack Developer, Part-time **07/2025 – Present**
Marilao, Province of Bulacan, Philippines (Remote)

Eli Works — Inventory Management System

- Built a full-stack inventory system for a motorcycle parts shop, featuring real-time stock tracking, sales recording, refunds, restock and activity logs.
- Admins can export sales reports to Excel, view weekly sales charts, and set low-stock alerts, while staff use a simplified interface for recording sales.
- Includes role-based access with separate admin and staff dashboards. Technologies: Next.js, TypeScript, Prisma.

LEGACY — Coffee & Barbershop (Sales & Staff Monitoring)

- Built a full-stack operations dashboard for a coffee shop and barbershop, replacing manual Excel tracking with a live web app.
- Staff log daily sales, remittances, and attendance, while the system auto-calculates gross/net totals, flags low-sales days, tracks progress toward daily goals, and ranks top-selling items.
- Designed a custom dark, editorial UI matching the client's brand, including a public landing page. Built with React, Tailwind CSS, and Node.js/Express with PostgreSQL (Neon), deployed on Vercel, with automated Excel reports via SheetJS.

CAPSTONE PROJECT

FoundNest — Cross-Platform University Lost and Found System **03/2026**
Bulacan State University • 5-member team • foundnest.vercel.app

- Co-developed a web and Android lost-and-found system for Bulacan State University, replacing manual logbooks with one centralized platform; evaluated against ISO/IEC 25010:2023 quality standards.
- Contributed to both the frontend (React, Tailwind CSS) and backend (Node.js/Express, PostgreSQL), covering lost-item reporting, found-item browsing, claims, and admin dashboards.
- Features AI-assisted item listing and automated image/text matching (Gemini AI), QR-code item registration, and a campus map for locating lost-and-found centers (Leaflet).

EDUCATION

Bachelor of Science — BS in Information Technology **01/2023 – 01/2027**
Bulacan State University — Malolos, Province of Bulacan, Philippines

CERTIFICATIONS

- **Information Technology Specialist - Python** — Certiport / Pearson **10/2026**
- **EF SET English Certificate 68/100 (C1 Advanced)** — EF SET **04/2026**
- **Responsive Web Design** — freeCodeCamp **04/2026**
- **Salesforce Supported Virtual Internship Program 2025 - Philippines** — SmartInternz **04/2026**
- **Internet of Smart Things: From Basic Set Up to Real Life Applications** — VRTSYSTEMS Technologies Corporation **03/2026**
- **CodeCraft: Mastering Essential Tools for Modern Software Development** — Bulacan State University **12/2025**
- **Agentblazer Champion Workshop** — Salesforce / SmartBridge **09/2025**

TECHNICAL SKILLS

Programming Languages	JavaScript, TypeScript, PHP, Python, HTML, CSS
Libraries & Frameworks	React, Next.js, Node.js, Express
Styling & UI	Tailwind CSS, Responsive Web Design
Database & APIs	PostgreSQL, Prisma ORM, REST API
Tools & Deployment	Git, GitHub, Vercel, Neon
